Copacabana Ottoman.....	100L
Costa.....	600L
Costa Pool.....	600L
Costa Premium.....	600L
Malibu Premium Day Bed.....	550L
Portsea.....	350L
Portsea Premium.....	350L
Positano 96cm.....	300L
Positano 120cm.....	600L
Teeny Bob Premium.....	300L

Bags with inner liner

Fill the inner liner first, then insert into the cover.

Bags with filling chute

Simply pull out the filling chute, and pour the beans into the bag through the filling chute.

safety locking zip

Bean Bags R Us products are fitted with quality YKK childproof locking safety zippers as required by law. These guard against children accessing the bean bag filling.

Please close all zippers and do not allow children to be present when filling. Please use a paper clip to open the zipper by inserting the paper clip under the zip lock and lifting. Once the lock is disengaged slide the zip to open or close.

FOR THE SAFETY OF CHILDREN ENSURE THE PAPER CLIP IS REMOVED ONCE THE ZIP IS CLOSED.

WARNING:

CHILDREN CAN SUFFOCATE IF BEAN BAG FILLING IS SWALLOWED OR INHALED. DO NOT LET CHILDREN CLIMB INSIDE THIS BEAN BAG. A BEAN BAG IS NOT A SAFE SLEEPING SURFACE FOR AN INFANT UNDER 12 MONTHS OF AGE. KEEP AWAY FROM NAKED FLAME.

beanbag care guide

commercial range

made with premium Olefin fabric suitable for indoor and outdoor use.

Thanks for choosing Bean Bags R Us. Your bean bag is manufactured to the highest quality, with double stitching and over locked seams. The heavyweight Olefin Fabric will last for years and is backed by our 12 month warranty. This fabric is stain and fade resistant. For best results, we recommend spot-cleaning where possible.

Keep this in a handy place for future reference!

Care instructions

For products with inner liners all you need to do is remove the inner liner full of beans to wash the cover and simply reverse the procedure by putting the inner liner bag full of beans back into the cover! The fabric is treated and is water repellent and resists stains so generally only spot cleaning will be needed. Should you choose to wash see instructions below.

Hand or gentle machine wash. Keep separate on gentle cycle in cold water only.

Air dry. **Do not** soak, tumble dry, bleach, iron or dry clean.

To spot clean wipe with a damp cloth and mild detergent. Do not use products containing bleach.

To avoid mould and mildew, clean and dry your bean bag before storing. Store in a dry place indoors, and avoid prolonged exposure to the elements.

Stain removal

Step 1: Prepare

1. First brush any substantial, encrusted marks by hand, using a brush or spatula, then vacuum clean.
2. Pre-clean with a neutral universal agent (incl. possibly dry foam as well).
3. After each cleaning remove any residual surfactant, using spray extraction.

Step 2: Treat

Please refer to our Treatment Guide for the appropriate treatment.

Step 3: After-Treatment

After each cleaning we recommended the use of spray extraction to remove any edge markings/residual cleaning agent.

Please note these are only general recommendations that cannot unreservedly 100% removal of stains. We recommended in all cases that you consult a professional cleaner.

- A. Treat with a normal commercial oxidative bleaching agent.
- B. Fresh stains: treat with an alkaline cleaning agent. Rinse off immediately.
Dried-in marks: treat with an enzyme agent. Note reaction time, wipe off gently.
- C. Treat with an agent containing solvent, using manual method as well (scrape off, beat lightly, vacuum clean when completely dry).
- D. Treat with dye-fixing agent. Possibly treat afterward with an oxygen bleaching agent.
- E. Fresh stain: treat with weak solution of organic acid (slightly acidic cleaning agent).
Rinse off immediately.
Dried-in marks: treat with a normal oxidative bleaching agent.
- F. Treat with a commercial rust remover or acidic stain remover. Rinse off immediately.
- G. Cut out burnt or melt stains. Take a piece of fabric of the same size (if none is available take it from a part of the material that is less visible) and stick in from the left with double sided tape.
